

## Letter of confirmation

### CMR Statement

Sodium chloride is not classified as carcinogenic, germ cell mutagenic, or toxic to reproduction according to Regulation (EC) No. 1272/2008.

No substances classified as CMR substances of categories 1A, 1B, or 2 are used or added during the manufacturing process.

In this regard, sodium chloride is not a CMR substance within the meaning of the CLP Regulation and does not contain any substances classified as CMR in accordance with Regulation (EC) No. 1223/2009 and Regulation (EU) No. 2026/78.
